

Message from the Principal (<http://www.hyoei.ac.jp>)

Principal Maruyama Hirohisa

Acquirement of “Knowledge”, “technique” and “the kindness (gentleness)”

Now we provides three courses of department largely divided, which is “the department of a dietitian”, “the department of a chef” and “the department of a confectionery Hygiene Master”. As you know, a dietitian supports the health care of community through food, and is playing an active part in fields, such as medical treatment, health, and welfare. A chef pleases people by offering a delicious dish and the dish considered healthily, and is contributing to society. Moreover, confectionery Hygiene Master provides society with a romance or a dream through the production of sweets, and is bearing the important role, which supports the time of one of relaxation and healing.

In order to be aware of the role given to each and to play an active part as a social member, it is not necessary to say that fundamental knowledge and technique must be learned exactly first and foremost.

We support you to grab your dream - “wanting to play an active part in a line of each field” - by providing the various curriculum which is not bound by a fixed idea, professors with abundant experience, and the most advanced equipments.

It is a “mental education” that one more thing we value. Neither abundant knowledge nor outstanding technique will also become what was truly useful, without the warm heart and the heart of consideration.

Hyogo NCC College aims to nurture a prominent member of society with kindness and independent spirit.
